PASSIONATE *about* MANUFACTURING *EXCELLENCE*

Swarovski is the premium brand and a leading manufacturer of precision-cut genuine gemstones & created stones, offering a unique, balanced selection of products made from the purest raw materials. Each genuine gemstone and created stone is crafted to satisfy the strictest standards for quality, color, size, and shape. The result: a consistency and quality unlike any other brand on the market and an unsurpassed creative vitality, inspiring creativity amongst some of the most talented minds within the fine jewelry, watch, eyewear and lifestyle electronics industries. We guarantee that all genuine gemstones and created stones are cut and polished in our own factories and thus meet or exceed the world's most stringent social and environmental standards.

Our dedication to the science of precision cutting and innovation has been a cornerstone policy of the company since its foundation in 1895. Ongoing research and development sets new standards of quality and craftsmanship offering a broad variety, along with applications and endless creative possibilities, giving manufacturers and designers numerous options when it comes to quality, colors, shapes, cost efficiency, and techniques.

Our stones are the best choice for effective stone setting, each cut with optimized proportions for maximum brilliance and fire. Calibrated heights and diameters as well as uniform girdles allow easy and fast stone setting with minimized breakage. Standardized sorting processes ensure uniform color and clarity, regardless of the size of the order.

We are committed to creating premium value for our clients and to nurturing products of the highest standards. We ensure that our partners profit from the value added that is achieved through the ever increasing brand strength of Swarovski and by the creative diversity of our products and services.

This catalog presents the depth and scope of our genuine gemstones assortment. Please keep in mind that when dealing with genuine gemstones, nature defines the limitations and the rough supply determines what is available on the market. Therefore, there is no guarantee that all items listed are readily available at all times.

TO MAINTAIN OUR COMPETITIVE EDGE AND KEEP OUR MANUFACTURING PARTNERS ON TOP OF THEIR GAME, WE:

- apply sophisticated data analysis tools to predict future production patterns in yield and availability, supporting our sales teams with daily stock reports (quality, size, and color grade) to best advise customer purchasing.
- sustain reliable relationships with international suppliers of genuine gemstone rough in order to ensure the availability of large quantities of high quality genuine gemstones. A network of gem suppliers also helps to keep track of the market.
- maintain proper cutting proportions – no matter how large an order – for maximum fire and brilliance.
- place emphasis upon symmetry and finish of genuine gemstones so that they are alive with brilliance and radiance and uniform in size, shape, and dimension – for problem-free setting.
- benefit from sophisticated sorting processes, managed by a well-trained quality assurance staff that provides a standardized product.
- guarantee categorization of material based on slight variations in quality and color, despite uniqueness of every natural gem.

MQ

All Swarovski MQ Genuine Gemstones are a composite of stones that are excellent in machine cut, brilliance and polish and stones with slight defects that are only visible under a 10x magnification loupe, e.g. minor facet symmetry defects. MQ stones include a clarity range from eye-clean to eye-visible inclusions. MQ products are suitable for IB projects.

FQ

All Swarovski FQ Genuine Gemstones are excellent in machine cut, excellent in brilliance, and excellent in polish. Each is cut to perfect facet symmetry and is color sorted. FQ stones are free of visible color zoning, and only slight inclusions are accepted. FQ stones have no defects visible to the naked eye, and only have very slight defects visible under a 10x magnification loupe.

GENUINE SAPPHIRES

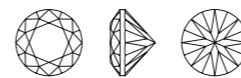

Sapphires are one of earth's most prized and treasured genuine gemstones. At Swarovski, we pay detailed attention to symmetry and finish; facets are precision cut and aligned to give our genuine sapphires maximum light dispersion and definition. Girdle consistency, in thickness and polishing uniformity, facilitates setting and reduces stone breakage.

Crown consistency, in height and pavilion depth, reveals the precious color, brilliance and beauty of each genuine sapphire.

We are committed to preserving the environment; therefore it is our goal to maximize the rough of all of our materials to the fullest. As a result our genuine sapphires are available in an amazing range of colors. Due to our eye for precision cutting, color consistency and a carefully composed color palette the subtle shades fade almost unnoticeably from one to another.

1.00, 1.10, 1.20, 1.25, 1.30, 1.40, 1.50, 1.60, 1.70, 1.75, 1.80, 1.90, 2.00

(additional sizes on request)

PRICE STRUCTURE & VALUE

The prices and value of our sapphires depend largely on the cut, size, shade, clarity, color and the sorting intensity of the stones. We have developed a pricing structure for our genuine sapphire product assortment that reflects the standards of the industry combined with the innovative intensity of our work.

Ordering only one specific color intensifies the process and ultimately increases the value of the order, justifying a premium price.

Ordering in "color groups" – not only one specific shade, but also the next lighter/darker color(s) – will enable us to offer you flexible prices.

Please note that lead times will be higher if you chose to order one specific color shade only.

SPECIAL SORTING

Special sorting is available – see page 5 (FQ) for specifications.

* see page 5

SWAROVSKI GENUINE TOPAZ

We guarantee to deliver superior products, cut only from the finest raw materials, which is reflected in their precision, purity, brilliance, and supreme color consistency.

NATURAL BRILLIANCE

Nature makes topaz stones incredibly beautiful, but we reveal the optimum brilliance and color with our precision cut.

The new Natural Brilliance Cut for our round topaz maximizes the light return and fire, which results in a more than 130% higher brilliance compared to standard topaz stones.

TCF™ (THERMAL COLOR FUSION)

Topaz’ innate white elegance and purity is enhanced by our Natural Brilliance Cut and environmentally sound surface coloration process, the TCF (Thermal Color Fusion) treatment.

The innovative TCF treatment, patented in Austria and the United States, has proven to be permanent and sustain cast-in place methods and cleaning processes like ultra-sonic, magnetic pin and acid bath, when pre-defined methods are maintained. Swarovski Topaz contains NO RADIATION – unlike irradiation, which modifies the entire gemstone, coloration by chemical modification is limited to the near-surface region.

ADVICE ON MANUFACTURING PROCESSES

For more details please contact your local sales office or go to www.swarovski-gemstones.com.

	White	Aqua Blue	Ice Blue	Paraiba	Kashmir	Rainforest	Honey	Poppy	Baby Pink	Pink	Blazing Red	Violac
COLORS WITHSTANDING COMMON JEWELRY PRODUCTION PROCESSES such as alkaline cleaning, electro plating and casting in place, except extensive mechanical abrasion												
COLORS NOT RESISTANT TO electro plating, alkaline cleaning and extensive mechanical abrasion												
COLORS NOT RESISTANT TO casting in place and mechanical abrasion												

CENTRIA CUT

Our top quality colored genuine gemstones are produced under the strictest supervision. Centria Cut is a supplementary program to our existing assortment of precision cut genuine gemstones.

QUALITY STATEMENT ON CENTRIA CUT

Tolerances: ± 0.15 mm

Polishing: Excellent, with polished girdle

Facet geometry/symmetry: Produced to the highest standards of conventional cutting methods

Proportions: Girdle to table precise and consistent, slight variation in height (average up to 13% of total height)

SORTING CRITERIA FOR CENTRIA CUT

All Centria Cut stones are sorted to exceed the highest standards in the market.

COLOR FAMILIES

Due to the nature of genuine gemstone material, availability of special colors in Centria sizes is limited. Therefore, we have created color families to provide the next closest shades in each color group for greater manufacturing opportunities. Gemstones are sorted to match the color system used in our standard genuine gemstone program.

MARCASITE

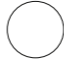

At Swarovski, we produce precision-cut marcasite stones with unrivaled polish in round, square, and baguette shapes in a range of sizes. Swarovski is uniquely positioned as the leading source of high-quality marcasite, attributed to more than 100 years of experience in the science of precision cutting technology.

INGREDIENT BRANDING PACKAGE

Our ingredient brand “Made with SWAROVSKI GEMSTONES” imbues any brand or product with true Swarovski brilliance. A special “Made with SWAROVSKI GEMSTONES” tag identifies products created and crafted by a selected Swarovski partner, assuring customers that they are buying a product set with the finest genuine gemstones.

Partners benefit not only from increased consumer confidence and recognition of the ingredient brand, but also from the high profile of our brand communication activities. They are offered an exclusive, premium package of communication and promotional materials, specifically designed for ingredient branding activities.

Ingredient branding partners are provided with additional services, such as trend & design support, technical support, and application training – all of which are designed with long-term creative partnership in mind.

This, in turn, boosts brand recognition in the marketplace.

PACKAGING & LABELING

Our packaging reflects the premium quality and the precision of our products and assures the customer of authentic Swarovski Genuine Gemstones and Created Stones products.

It is designed to be easily handled and stacked. The unique see-through design makes it easy to identify the contents. The packaging seal reflects our exacting manufacturing standards at a glance and can be easily resealed. We can only guarantee genuine premium quality when the packing seal is intact.

BAR CODING

In order to track the history of an order, we label every single package with a bar code. This is our guarantee of the quality and the origin of the stones in the package.

TRUSTSEAL®

A Trustseal® - similar to a hologram and virtually impossible to copy - secures each package and confirms that the products you receive are authentic finest quality Swarovski Genuine Gemstones or Created Stones.

You can easily distinguish between the packages of genuine gemstones, created stones and marcasite. Our created stones come with a blue label, the genuine gemstones are all labeled in pink and marcasite in gray.
